

Dear Sirs,

My husband and I came exclusively to the USA to build the Quixtar business. We have been very fortunate to be with people that are helping us and we have been able to understand the American culture and start moving forward with our business.

We are currently making around \$1,500 dollars a year. We are expecting between now and June 2007 be able to make \$2700 per month, we will need to sponsor 15 to 20 new IBO's start there own business, and help them first make money. What we love of the Business, if you do not help people make money, you do not make money, it is a plain field.

The business has done so many good things for our family, one of the things you learn in the business is to have a united family, give your children the best example, install values of moral and always perform with integrity and honesty. Respect others and install in others the best example.

We love this country more and more for the opportunities that we have by having a Free Enterprise system.

You would think that with what we are making we could do something else, we would say that if we have stayed in the business is because we believe strongly that is the best option for our family, we have help from our up-line and team and we just need to be more consistent in order to achieve the goals that we have establish.

When we sponsor people we make sure they received the appropriate information and before they take there decision we explain what is required to be successful, we explain to them that it requires work, persistency and consistency, like any other thing, even a job. If you do not work it, it will not work. We provide them literature, audio cds of people that have achieve important levels of income, let them know we meet in informational seminars and training sessions if they want to get the knowledge like if they were going to get train in other type of business or career.

We usually suggest our prospects to register with around \$170 dollars, that includes all the catalogs, insurance, virtual office, access to the site and products so they start learning about them given it will be what they will be using and selling. If they do not want to get products right away they can register with around \$70 dollars.

We understand that you have a period of 90 days to return the registration kit if they do not want to continue.

Our opinion in the proposals:

Waiting Seven day Period:

Our business is build with people that are excited about the idea of having a business of there own. It is true that if its for them it will not matter if they have to wait, but just think if we have a friend that wants to register, he would wait seven days, then if he has someone interested that person would register 7 days after and if the friend of the friend has another person to register again they would wait 7 days, and so on, so on, you are taking of waiting 21 days just in this example, people loose enthusiasm when there are so many days to start their business.

Quixtar has the policy that if they do not like the business after register, they get their money back.

Requirement to provide references:

We believe that it's a responsibility of the prospect to learn about what they are getting involved in, as any other business that is the conscious thing to do. One of the things we usually do is suggest to the person to meet our team members and even learn more if they want before registering. When you go to a bank, the bank does not provide you with personal information of other clients, because of a privacy act. We believe this business as any other is the same. It is responsibility of the person that is going to invest in the business to go to the proper channels of information to get the knowledge of what he or she is getting involved example are, Better Business Bureau, Quixtar, and even read the biographies of the founders of Quixtar.

Requirement to provide a "litigation list":

We think that it will scare people to get into the business and definitely affect our business. Not every body has enough common sense to go to the source and see that Quixtar is a great opportunity. All companies have litigations and we do not see their litigation list on the door of their business, why? Because people would not buy the products, if people do not buy products, there is not enough money for salaries, companies pay less taxes and it affects every one. We think that if we would provide this list, then any business should, and will affect people buying or investing.

Requirement for specific earning disclosures:

We show what the average IBO's makes per month, we believe that it important they see that it depends on your effort of how much you want to make with your business.

Requirement for financial substantiation:

We strongly believe in private information, it can even be a risk for us when we start making a lot of money. We give them FTC approved literature. We tell them our experience, what it has done for us, why we even came to the U.S and that they will need to work and get the knowledge. We tell them that they will have to make their part work, like creating at least the 100 points if they want to receive a 3% check, and teach others the same, because we do not get paid for people coming in the business and not buying products, we get paid on volume. We always tell people that it is their business. They have control and they decide what to do with it. Everything in our business is optional.

We are excited about our business, the way it works and the professionalism of Quixtar and the vision of the owners, giving opportunity to every body that wants to have a business.

Best regards,

Gabriela Limon
